**Subject:** net metering approval

This is just a quick follow up e-mail, to again encourage you to approve 'net metering'. As I spoke with APS today, again, I was told that APS solar billing department is ready to do 'net metering' for the solar system that I installed last year. APS again told me the delay is waiting for the Corporation Commission to approve the 'net metering' packet.

Just a reminder; we installed a solar generating system late last year and at that time, understood that "net metering" would be in effect by the end of 2006. We are producing an excess of power for APS, and aiding our environment.

I strongly encourage you to approve "net metering" to be effective without delay.

I would be more than happy to discuss this issue further with any of you. I am available at 928 468 2129.

Thank You for your immediate attention in approving "net metering".

Linda D Jackson
